

Ford Romania Intern Program Internship Workplan

Function Name:	T C & FINAL	Supervisor Name:	Ovidiu Cristea
Department Name:	Maintenance	Supervisor CDSID:	ocristea
Assignment Location:	Craiova	Supervisor Position#:	Manager

Project Description

The internship is going to get knowledge about modern Maintenance processes and how these are linked with other systems in the Company (production, engineering, logistics, e.g.)

The internship will get knowledge about the noxious ventilation system in order to decrease the measured values of those and how maintenance process is a part of Lean manufacturing concept.

Measurable Objectives

- The internship will be expected to be able to demonstrate that they have learned how noxious system extraction works with the Environmental requirements;
- At the end of the program, the internship should be able to increase the capability of noxious extraction system (calculate the extraction flow, ...) to be in conformity with approved upper limits;
- At the end of the program the internship will be assessed on team work behavior, communication and accuracy of the task completed.

Expected Major Contributions

- Support the team in the day to day business;
- Come with "fresh eye" new ideas.

Expected Benefits to Intern

- Get knowledge of Maintenance procedures used in automotive companies.
- Exposure to a wide variety of manufacturing and business related activities.
- Be a part of a Global team and of cross functional projects.

Intern Qualifications (schooling, work experience, major)

- Must be studying for Mechanical related degree.
- Have a high level of English and computer skills.
